MupuSeal® Type 3052-

Spring energized flange seal for external pressure

### MupuSeal® Type 3052-

Is a spring energized flange seal for external pressure and dynamic applications. MupuSeal® consists of a jacket of Kefloy® energized by a V-shaped corrosion resistant steel spring.

The steel spring is available in three different chemical resistant alloys.

- Stainless steel                   AISI 301; DIN 1.4310
- Hasteloy® C-276               EN ISO 15156; NACE MR-01-75
- Elgiloy®                         ASTM F1058; EN ISO 15156; NACE MR-01-75

Hasteloy® is a trademark of Haynes International Inc.  
Elgiloy® is a registered trademark of Elgiloy Specialty Metals

The flexible V-spring gives a good spring force which ensures the sealing capacity. MupuSeal® is designed for dynamic applications at moderate speeds. MupuSeal® can be used with virtually all fluids.  
MupuSeal® is pressure responsive.

### Working Range

#### Pressure

Up to 45 MPa in standard execution. For pressures exceeding 45 MPa, please contact your O.L. Seals distributor.

### Important Note

The limits of pressure, temperature and velocity are individual maximum values. Heat generated by the friction may cause local increase of temperature. The cooling possibilities for the system determines the combinations of maximum values.
